

"BUBBLE PACK CUSHIONED COMPOSITE, METHOD OF
MAKING AND ARTICLE MADE THEREFROM"

ABSTRACT OF THE INVENTION

5 There is disclosed a method of forming a foam product,
comprising the steps of forming a layer of uncured polymeric foam; applying
to the layer of uncured foam a layer of bubble pack, such that the bubbles that
extend outwardly from the bubble pack at least partially penetrate into the
uncured foam; and curing the layer of uncured polymeric foam. Products
10 made by the process are also disclosed.
